

TAHVIEH HAMOON

HV Roof Exhausters

are designed for roof mounted applications exhausting relatively clean air. They feature a spun aluminum housing and a non overloading backward wheel. Motors are located out of the airstream with positive cooling by ambient air.

Accessories

Birdscreen

Birdscreen is standard on all models. The design of the screen has been selected to prevent the entrance of foreign objects and minimize the resistance to air flow.

Dampers

Gravity or motorized dampers are available for mounting in ductwork or on interior walls. Recommended sizes are shown on the dimensional table.

Protective Coating

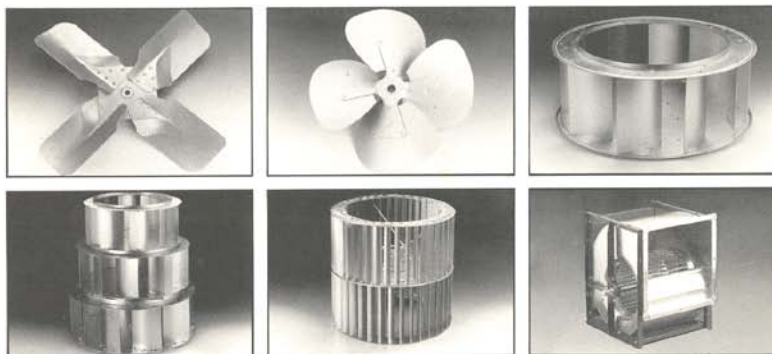

Special finishes are available for protective application.
